Will government funding materialise to meet the high demand of diagnostics?

The thirty-fourth edition of LaingBuisson's *UK Healthcare Market Review*, sponsored by Avison Young, is vital reading for independent providers, commissioners, advisors and investors active in the UK's independent healthcare and social care sectors.

Published in February 2023, and written during the winter 2022, the *Review* reflects on how the independent healthcare and social care sectors have emerged from the Covid-19

crisis.

LaingBuisson's *UK Healthcare Market Review* gives a valuable overview of the operating landscape for health and social care service providers across all parts of the market. It looks at current market values and capacity, recent trends, market concentration, leading players and funding sources, as well as key issues for the future.

LaingBuisson figures demonstrate how the independent sector, whether as a provider of services directly to private payers or as a partner to local authority and public health services, continues to play a vital role in our healthcare economy.
